Do you use the Radio Spectrum?

Do you have someone in your organization that represents your interests and requirements to Government & the Government organizations that set your operating conditions and level of license fees?

Join the Radio Frequency Users Association of NZ, and allow our expert volunteers to protect, promote and preserve the Radio/Wireless Spectrum

*Help US to
HELP YOU!*

One Case Study

Below is one of many examples of how RFUANZ has helped the community;

The issue:

MED proposed to SIGNIFICANTLY INCREASE two-way repeater & point to point linking annual licence fees in their 2004 fees review.

What RFUANZ did for our members:

With significant negotiations and communications between RFUANZ board members and MED and other Government officials, the MED fee increase proposal was successfully challenged.

The Outcome:

Rather than a blanket, significant increase in fees, following RFUANZ negotiations, fees were held in most areas, a small number were increased, and a few were actually reduced!

The prime function of RFUANZ is to:

- **Protect**—the rights of organizations and individuals who require access to the Radio/Wireless Spectrum to maintain and support their business
- **Promote**—The Wireless Spectrum is a finite resource and under constantly increasing pressure from competing interests.
- **Preserve**—RFUANZ provides a collective voice, that is recognized in Government circles, for member organizations and users throughout NZ, that depend on equitable and fair access to the radio/wireless spectrum

About RFUANZ:

- RFUANZ is a non-profit organization whose membership includes Local Government Authorities, Transport, Communications, Courier, Taxi, Veterinary, Consultancy, Radio Dealer, Radio Network Operators, Tourism companies and private individuals.
- RFUANZ was formed in 1990, following de-regulation of the Telecommunications industry, and as a result of the merging of the traditional Radio-Telephone User Associations and private two-way radio Network Suppliers.

We need you

Your participation is vital as we move to a converged society. We want you to help us to work with our Government to ensure any changes made to the management of the Wireless Spectrum is influenced by users.

Your membership is VITAL to sustain our participation in the industry.

If you or your company depends on radio and wireless communications to operate effectively you should belong to RFUANZ.

i.e. if you use two way radio, telemetry, scada, point to point linking, tele-paging, microwave linking, satellite communications, cellular services, wimax, wifi, or any device requiring the use of NZ Radio Frequencies, RFUANZ is your advocate.
